Freelance PV technical draftsman

Beschrijving

“Where will you get the energy tomorrow?”

Eoluz NV (www.eoluz.be) is one of the leading players in the exciting sector of photovoltaic solar energy systems. Known for the 10 MWp PV installation on the Audi factory in Vorst, we realized more than 600 installations of industrial projects in Belgium and Luxembourg.

Our focus is mainly on the realization of new solar parks, together with the maintenance and optimization of existing solar parks, whereby we will be developing the maintenance portfolio with great speed expand. As part of our growth, we are urgently looking for a motivated and technically driven talent (m/f) to join our team.

Jouw Functie

- As a technical draftsman, you will be at the heart of the optimal design of new PV installations.
- To do this, you will use a CAD software package;
- You are primarily responsible for drawing up sales plans and secondarily for execution plans;
- You will support colleagues in both the sales department, the project department and the service department;
- You enjoy sharing your knowledge and insights with your colleagues.

Jouw Profiel

- An experienced free-lancer with extensive knowledge of CAD applications;
- Willing to work two days (to be discussed) per at our office;
- Goal-oriented and flexible scheduling ability communicatively strong.

Ons aanbod

- A rate will be mutually agreed upon.
